HIRE

Enhancing Candidates Opportunities for Successful Interviews

October 2024

Newsletter #2

Welcome to the 2nd Newsletter of the HIRE project where we will share updates on project news!

Ultimate Interview Preparation Platform

Partners are currently in the final stages of developing the **Ultimate Interview Preparation platform**. This digital platform will provide VET trainers and learners with comprehensive resources to prepare for job interviews. The platform is divided into two sections: one for learners, offering modules on soft skills, interview facts, and a repository of common and tricky interview questions, and another for trainers, featuring detailed training notes, training exercises, assessment quizzes, and interview techniques. All materials will be available for download, allowing trainers to customize them for future use.

Learner platform:

- E-learning with soft skills
- Facts and statistics
- Interview Techniques
- Questions and Answers

Trainer Platform:

- Quizzes
- Trainers' notes
- Training Activities

Enhancing Candidates Opportunities for Successful Interviews

PILOTING WORKSHOPS & MEETING

To ensure high-quality results, a total of more than **100 learners** participated in the piloting sessions of the **Ultimate preparation platform content**, with a focus on adults entering the labor market, particularly those from disadvantaged backgrounds like NEETs and the long-term unemployed. The two-day trainings marked great success, with positive feedback from participants!

Second Transnational Project Meeting

On September 12th, 2024, a meeting was held in **Valencia, Spain**, to discuss the upcoming piloting sessions for the Ultimate Interview Preparation platform. Partners reviewed the development progress of the platform, which is designed to equip VET learners and trainers with comprehensive tools for job interview preparation. The meeting focused on finalizing the training materials and planning the national training sessions, which will involve at least 25 learners per partner. Partners also outlined the evaluation process, which includes peer reviews and external expert assessments, ensuring the platform meets the needs of the target groups.

Additionally, partners shared insights about the WP3 **AI Interview Simulator**, which aims to provide interactive and personalized interview training experiences. This innovative tool is expected to enhance learners' preparation by offering real-time feedback and tailored questions based on individual profiles.

COMING SOON

INTERVIIEW PREPARATION APP

- Customised Avatars
- Emotion Analysis through AI
- More than 120 questions repository
- Individual Feedback Reports
- 4 languages
